How to Burn a CD Using Roxio Easy CD Creator

- Double click easy cd creator icon on desktop, this will open up the program that enables you to burn a CD, or go to Start, Programs, Roxio Easy CD Creator 5, Applications & click Easy CD Creator
- Use the drop down box to select the location of the files you need to burn to the cd.
  - This is the drop down box you click to look for your files
  - This is a list of the folders and files inside of the folder that is selected.

- When you find the files you want to burn, select them and click the ADD button. This will add them to the cd project frame.
- After you add all your files, click the red record button and this will start the burning process of your cd.
  - Note: Your project size CANNOT exceed 750 -800 megabytes, depending on the cd you have.
- You will be able to tell if your cd project is full by the status bar down below.
  - This is the project status bar, and the green line tells you when the CD you are burning is full

- When you are finished recording, if it asks you if you want to FINALIZE the project or not, say YES.
- Close the program and exit out, it is not necessary to save the project. Eject the CD. Use a permanent marker to write on the CD. Make sure you write on the clear side, *NOT the blue side.*
